

Environmental Policy

ArcelorMittal

ArcelorMittal Kent Wire Limited operates a modern steel fabric reinforcement plant that produces a wide range of reinforcement products to meet today's customer demands in the market place.

Steel is the material of choice for environmental protection. It is not only environmentally friendly; it out-performs other materials as it is readily recyclable.

Environmental excellence incorporated into all processing activities is to be promoted by the following principles:

1. Implementation of the **environmental management systems (EMS)** including ISO 14001 certification.
2. **Compliance** with all relevant environmental laws and regulations and other company commitments.
3. **Continuous improvement** in environmental performance, taking advantage of systematic monitoring and aiming at pollution prevention.
4. Development, improvement and application of low impact, **environmental production methods**.
5. Development and manufacture of **environmentally friendly products** focusing on their use and subsequent recycling.
6. Efficient use of **natural resources, energy and land**.
7. Where technically and economically feasible, the management and reduction of the **CO² footprint** for steel reinforcement production.
8. **Employee commitment** and responsibility in environmental performance.
9. **Supplier and contractor awareness** and respect of ArcelorMittal's environment policy.
10. **Open communication** and dialogue with all stakeholders affected by ArcelorMittal Kent Wire's operations.

The success of this policy requires the involvement and commitment of everyone working for and with us.
